## GREYWACKE WILD SAUVIGNON 2020

**TASTING NOTE** Imagine a summer fruit salad of paw paw, honeydew melon and ripe, golden quinces – drizzled with citrus flower water and a squeeze of orange skin oil. A delicious floral fragrance and juicy tropical fruit, infused with a fennel-like herbal thread and a faint whiff of wood smoke. Fermented entirely with naturally occurring yeast, this is an alternative style of sauvignon blanc that is both intricate and textural, with a rich, succulent palate finishing crisp and long with a flinty dryness.

**VITICULTURE** Fruit was sourced from various vineyard sites in the Southern Valleys and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. Soil types vary from the young alluvial deposits of Rapaura and Renwick, which contain high proportions of greywacke river stones, to the older and denser clay-loams of the Southern Valleys. A high percentage of the vineyards were trained using the divided Scott Henry canopy management system, with the balance on two- or three-cane VSP (vertical shoot positioning).

**WINEMAKING** Some vineyards were harvested by machine during cool (often cold) night-time conditions and others by hand during the day. The grapes were lightly pressed to yield a modest volume of high-quality juice, which was then cold-settled prior to racking into French oak barriques, a small percentage of which were new.

The juice was allowed to undergo spontaneous indigenous yeast fermentation, the tail end of which continued for well over six months. The wine had occasional lees stirring and approximately two-thirds underwent malolactic fermentation. It was transferred out of oak prior to the following harvest and left on yeast lees for a further five months. The wine was bottled in September 2021 with alcohol 13.5%, pH 3.16 and acidity 6.3 g/l.

## GREYWACKE WILD SAUVIGNON 2019

**TASTING NOTE** Seductive aromas of homemade apricot jam, vanilla cake and candied lemon peel mingle with a tarragon-like herbal quality, scents of dried meadow hay and a whiff of flintiness. Fermented entirely with naturally occurring yeast, this is a 'wild child' sauvignon that is both intricate and textural, with a generous, succulent palate that is packed with stonefruit and citrus – a luscious style, yet crisp and dry, with remarkable ageing potential.

**VITICULTURE** Fruit was sourced from various vineyard sites in the Southern Valleys and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. Soil types vary from the young alluvial deposits of Rapaura and Renwick, which contain high proportions of greywacke river stones, to the older and denser clay-loams of the Southern Valleys. A high percentage of the vineyards were trained using the divided Scott Henry canopy management system, with the balance on two- or three-cane VSP (vertical shoot positioning).

**WINEMAKING** Some vineyards were harvested by machine and others by hand, all into half-tonne bins, which were tipped directly into tank presses. The grapes were pressed lightly and the resulting juice was cold-settled prior to racking into mostly old French oak barriques.

The juice was allowed to undergo spontaneous indigenous yeast fermentation, the tail end of which continued for well over six months. The wine had occasional lees stirring and approximately three-quarters underwent malolactic fermentation. It was transferred out of oak prior to the following harvest and left on yeast lees for a further eight months. The wine was bottled in December 2020 with alcohol 14.0%, pH 3.11 and acidity 6.2 g/l.

## GREYWACKE WILD SAUVIGNON 2018

**TASTING NOTE** An enticing combination of ripe summer fruit, fresh herbs and flowers. Candied citrus peel and honeysuckle, shortbread and brioche, tarragon and lemon thyme. A feast of sweet perfume intertwined with a delicate, smoky nuance. Fermented entirely with naturally occurring yeast, this is an alternative style of sauvignon blanc that is both intricate and textural, with a rich, generous palate that finishes with a flinty dryness.

## GREYWACKE WILD SAUVIGNON 2017

**TASTING NOTE** A sweet-scented fusion of fragrant summer fruit and pastry shop perfume, peaches and nectarines, apple custard and lime meringues – all mingled with a dill-like herbal quality and a faint hint of wood smoke. The palate is fleshy and brimming with stone fruit and citrus, finishing crisp and juicy with a long, flinty dryness. Fermented entirely with naturally occurring yeast, this is an alternative style of sauvignon blanc that is both intricate and textural.

## GREYWACKE **WILD SAUVIGNON** 2015

**TASTING NOTE** Decadent patisserie aromatics - brioche, homemade apricot jam and lemon curd, layers of nectarine, yellow peach and ripe pineapple – infused with herbal nuances of tarragon and thyme. Fermented entirely with naturally occurring yeast, this is an alternative style of sauvignon blanc that is both intricate and textural with a rich, generous palate.

**VITICULTURE** Fruit was sourced from various vineyard sites in the Southern Valleys and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. ## GREYWACKE WILD SAUVIGNON 2012

**TASTING NOTE** Fermented entirely with naturally occurring yeast – this is an alternative style of sauvignon blanc that is both intricate and textural. A delicate combination of musky peach-skin aromatics and gentle citrus-blossom notes – a dash of lime cordial and a hint of saffron. The palate is lusciously herbal, long and refreshing with flavours of white nectarine flesh, dill and hints of fennel. The finish is succulent and crisp with almost a flinty dryness.

**VITICULTURE** Fruit was sourced from various vineyard sites in and around the Brancott Valley and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. Soil types vary from the young alluvial deposits of Rapaura and Renwick, which contain high proportions of greywacke river stones, to the older and denser clay-loams of the Southern Valleys. The majority of the vineyards were trained using the divided Scott Henry canopy management system, with the balance on two- or three-cane VSP (vertical shoot positioning).

**WINEMAKING** Some vineyards were harvested by machine and others by hand, all into half-tonne bins, which were tipped directly into a tank press. The grapes were pressed relatively lightly and the resulting juice was cold-settled prior to racking into mostly old French oak barriques.

The juice was allowed to undergo spontaneous indigenous yeast fermentation, the tail end of which continued for over six months. The wine had occasional lees stirring and approximately two-thirds of the barrels underwent malo-lactic fermentation. It was transferred out of oak during the following harvest and left on yeast lees for a further five months. The wine was bottled in October 2013 with an alcohol of 14.0%, pH 3.25 and acidity of 6.7 g/l.

## GREYWACKE **WILD SAUVIGNON** 2010

**TASTING NOTE** Fermented entirely with naturally occurring yeast – this is an alternative style of sauvignon blanc that is both intricate and textural. An intriguing fusion of homemade apricot jam and lime marmalade is layered with dried tarragon and a doughy, flinty complexity.

The palate is loaded with succulent fruit, pithy citrus rind and laced with minerality – a 'wild child' sauvignon with weight and persistence that finishes crisply, with a grapefruit twist.

**VITICULTURE** Fruit was sourced from various vineyard sites in and around the Brancott Valley and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. Soil types vary from the young alluvial deposits of Rapaura and Renwick, which contain high proportions of greywacke river stones, to the older and denser clay-loams of the Southern Valleys. ## GREYWACKE WILD SAUVIGNON 2009

**TASTING NOTE** Transformed by naturally occurring fermentations this is a sauvignon blanc of considerable depth and opulence. The bouquet has the lushness of a lemon crème brûlée, with sweet vanillin notes infused with thyme and toasted sesame. The palate is generous and crammed with savoury complexity – a 'wild child' sauvignon that is rich and creamy with a lingering chalky texture.

**VITICULTURE** Fruit was sourced from various vineyard sites in and around the Brancott Valley and the central Wairau Plains, specifically in Woodbourne, Renwick and Rapaura. Soil types vary from the young alluvial soils of Rapaura and Renwick, which contain high proportions of greywacke river stones, to the older and denser clay-loams of the Southern Valleys. The majority of the vineyards were trained using the divided Scott Henry canopy management system, with the balance on two- or three-cane VSP (vertical shoot positioning).

**WINEMAKING** Some vineyards were harvested by machine and others by hand, all into half-tonne bins which were tipped directly into a tank press. The grapes were pressed relatively lightly and the resulting juice was cold-settled prior to racking into French oak barriques, the majority of which were old.

The juice was allowed to undergo spontaneous indigenous yeast fermentation, the tail end of which continued for almost 12 months. The wine had occasional lees stirring and approximately two thirds of the barrels underwent malo-lactic fermentation. It was transferred out of oak during the following harvest and left on yeast lees for a further four months. The wine was bottled in August 2010 with an alcohol of 13.3%, pH 3.25 and acidity of 7.2 g/l.
